BRAND PERSONALITY

The StylzzByCliff brand is rooted in street art meets barbershop culture. The caricature-emblem logo — a barber surrounded by tools in a crest formation — communicates skill, personality, and swagger. The brand should feel like walking into a shop with loud music, fresh cuts, and real talk.

DESIGN PRINCIPLES

- Bold Contrast**
Use strong dark/light contrast. The brand thrives on impact, not subtlety.
- Red Pops**
Clipper Red is your action color — every screen should have at least one red element.
- Gold = Premium**
Reserve Gold Blade for premium/loyalty features to create aspiration.
- Street Typography**
Condensed, uppercase headings. The type should feel like a marquee, not a textbook.
